Technical Notice

HATOLITE LIGHTBULB PAINT

Product designation: **HATOLITE LIGHTBULB PAIN**T is a heat resistant, synthetic resin available in 8 colours, (see colour card).

Description of material: **HATOLITE LIGHTBULB PAINTS** are quick drying, transparent paints used in making glass slides and for coating lightbulbs no larger than 60 watts.

Directions for use: HATOLITE LIGHTBULB PAINTS can be applied by brush or spray or, in the case of bulbs, dipped. Do not dilute but use at full strength; if colours are too intense, mix with clear **HATOLITE.**

Other directions: Close any opened containers tightly. Immediately clean all tools and brushes with **HATOLITE** thinner.

Safety: **HATOLITE** is flammable. Do not smoke and keep away from sparks and open flames. Any time you are spraying, it is advisable to wear a face mask and work in a well ventilated area using an exhaust system which draws the fumes or particulates away from the painter.

Marking: Combustible liquid within the meaning of the Hazardous Substances Directive. Category A2 as per Directive on Flammable Liquids.

Supplied in: 1 litre containers.

We have compiled the above information based on our own extensive experience working with this product. It is believed to be reliable. However, no warranty, guarantee or representation is made to the correctness or sufficiency of the information and offering it does not constitute or imply any liability. The user of this product must decide what measures are necessary to safely use this product, either alone or in combination with other products. We always recommend that a test be made with any product you have not tried before.
