ABRASIVES

Flints' abrasives are chosen for their quality and value. Ultimately, hand sanding achieves the best results prior to painting or varnishing but it can be very time consuming. A good compromise is to use an orbital sander on the large flat areas and hand sand any rounded and convex parts which would be cut away too quickly with a machine. Watch the video to see the results.

G

600 grit and finer	Used prior to polishing.
400 grit	Used prior to topcoat of varnish or enamel on
	best brightwork.
320 grit	Used prior to top or second to topcoat.
240 grit	Used to flatten undercoats and early varnish coats
120 grit	Used to prepare raw timber prior to first primer
	coats of varnish or paint.
80 grit	Used to remove old paint and filler prior to finer
	sanding.
60 grit and coarser	Used for rapid removal of excess filler and for
	shaping timber.

Choosing the grit

Choosing the abrasive type

Waterproof Paper can be used wet on plastics or previously painted or varnished surfaces. The water helps to lubricate the surface and reduces clogging. It also prevents dust. However, it is hard to judge where the paper has fully matted the surface while it is wet and the water will penetrate small screw holes and may take many hours to dry. Waterproof paper can also be used dry.

Typical applications would be for fine finishing of display cabinets, finishing prior to gold leaf or Dutch metal, hand prop finishing, preparation prior to spraying and marine varnishing.

Glass Paper is suitable for the carpentry shop prior to painting and for removal of splinters where a block plane cannot be used. Most conveniently supplied on a roll.

Hook and Loop Abrasives are becoming more and more popular. They are quickly attached to hand blocks which are normally supplied with one medium and one very soft side. The lack of waste and speed of sheet changing plus the ease of storage makes this a good versatile choice for the propshop. All the Mirka sanding sheets listed attach this way.

Emery Cloth has a blue twill cloth backing and is used in engineering shops for cleaning of rust, surface preparation and fine finishing.

Abrasive Pads are available in four grades from ultrafine for denibbing and keying between paint coats to heavy-duty for removal of corrosion on steel and aluminium. They can be used dry or with water. When used with a hose they will clean and prepare in one quick operation.

Mirka Iridium Triangular Sheets

Festool Compatible Hook and loop fastened sheets. Premium abrasive for universal sanding. Mix of ceramic and aluminium oxide grains on a flexible

paper with precision coating that prevents clogging and reduces pilling. Top stuff.

Mirka Irirdium & Abranet Sanding Discs Festool Compatible We stock 2 types of Festool-compatible discs. The 90 mm Iridium abrasives have a mix of ceramic and aluminium oxide grains on a flexible paper with precision coating that prevents clogging

and reduces pilling. The 125 mm and 150 mm feature the Abranet technology, which means the whole sheet is a mesh reducing the need to perfectly orient the sheet onto the tool, and allows for maximum dust extraction. This allows for truly dust-free sanding (when used with a dust extractor). We really rate them. Both have velcro-like attachment.

HAND SANDING

Glass Paper [280 x 230 mm] Good oldfashioned sandpaper for use on timber prior to painting. F2, M2 and S2 are the most popular sizes. For really effective hand sanding why not try the hook and loop system? Don't forget your Puggy Gloves [page 343].

ABRASIVE PADS

Abrasive Pads [152 x 229 mm] May be used dry or with water. These pads are an excellent choice for paint preparation on old dirty pre-painted surfaces. When used with running water from a hose, they will clean, denib, and matt the surface in one action leaving it ready to accept paint. Sold each.

Abrasive Pads		code	price	20+
Ultra Fine	Denibbing and keying between paint coats	ABR500E	£1.47	£1.02
Very Fine	Fine metal cleaning and keying prior to paint	ABR501E	£1.47	£1.02
General	Scouring and cleaning	ABR502E	£1.63	£1.02
Heavy-duty	Removal of corrosion on steel aluminium etc.	ABR503E	£1.63	£1.02

WIRE WOOL & BRUSHES

Wire Wool Use for abrading, cleaning, buffing, polishing and removing. We also highly recommend the above abrasive pads.

Mini Wire Brush Set Like oversized toothbrushes these are great for getting at difficult to access places to clean up and de-rust prior to painting. They have a comfortable soft grip handle. One of stainless steel, one of brass and one of nylon. Length: 175 mm. Bristles: 40 mm x 10 mm wide.

Mini Wire Brush Set 3 brush set code price TOLROU52005 £7.30

Purdy Cushion Grip Wire Brush This short handled brush has unique criss-cross bristles made from rustproof stainless steel. The handle is rubberised for comfort, has a pistol grip, and a

hammerhead end. The brush head has side grips so you can really attack your rust. It's really lightweight too! Sadly Purdy have discontinued their rather good Block Brush which could be used with an extension pole. Qué será, será!
