Developed by the Boeing Company, and originally intended for use on metals under threat from rust and corrosion, Boeshield can be used on paint, plastic, rubber, fibreglass or vinyl. It penetrates crevices deeply, displaces moisture, dissolves minor corrosion and leaves a clean, waxy coating with long-lasting durability. For backstage use, it provides a waterproof film which is non-sticky, doesn't leave an oily residue and is non-conductive so is handy to use around lighting and electrics. Also suitable for outdoor events such as festivals, concerts or open air performances where you want to protect your rigging and tools from the inevitable rain. You can rinse off sand, dust and mud with water leaving the Boeshield coating intact. 340 g aerosol can.

Flammable or inflammable?

They mean exactly the same thing. The "in" is from Latin like enflamed. Please don't think inflammable stuff won't burn – it will!
