

# DELIVERY

## GENERAL INFORMATION

Flints realise that you need your goods in time for your fit up and that budgets can be tight. We use delivery companies who are firstly reliable but offer great value too. The diverse nature of our strange products results in unavoidable exceptions, but as a general rule:

**A small bag costs £6.50**

**A big heavy box costs £15.00**

**If your order exceeds £300.00 it goes FREE**

**In Central London orders over £75.00 go FREE**

Ok, that was the easy bit that applies to most of our deliveries but here are the nitty gritty details.

## NOW FOR THE EXCEPTIONS

**Product Exceptions: [UK Only]** Stage and counterweights, filled sandbags, lead shot bags, polystyrene cutters and nails are carried at the rates quoted below regardless of order value. Flooring, access equipment, staging, lifts, hazardous goods including Froth-Pak and pyrotechnics, oversized goods and hire goods: Please call for delivery prices for these items. Scaffolding is a bit complicated: Full lengths can be delivered UK Mainland for £25.00. Outside our London van run there is a minimum quantity of five. Cut lengths up to 3.6m can be delivered on our normal carriers and are charged as per the normal delivery terms shown on this page. Cut lengths over 3.6m can only be delivered on our London van run at £25.00. If your requirements fall outside this policy we would be happy to obtain a tailored haulage quotation for you.

## CENTRAL LONDON

**London** Most deliveries in the London postal districts are made on our own vans. Orders over £75 net are delivered free of charge. A £5 charge is made for smaller orders. Urgent deliveries can be sent by bike or parcel car. The following postcodes are included in our van run, for other postcodes refer to our UK deliveries below. All WC and EC postcodes. ### Tons, tonnes, short tons and hundredweights

Most lifting items nowadays will be rated in tonnes and kilograms. The symbol for a metric tonne is always a small "t". It = 1000kg. The old imperial Ton always has a large "T" and is equal to 1016kgs. So if you come across a piece of lifting gear rated in old Tons you can, for practical purposes, convert it straight into tonnes. The old Ton is divided into hundredweights [cwt]. There are 20 cwts to 1T. 1 cwt = 50.8kg. Just to confuse us, the Americans have their own ton which is often referred to as a short ton. 1 US ton = 907kgs.
