Designer Products

Welcome to our range of designer films: a clean and cost effective way to add sparkle to your set, duplicate an industrial setting, or evoke a ghostly luminous glow. These films are vinyl and can be applied to flat and slightly curved surfaces. They are hot-embossed to produce deeper and more defined patterns. Intended for indoor use, with proper care and handling they offer an indefinite indoor life. Coated in a permanent pressure sensitive water-based clear acrylic adhesive they will adhere to a wide variety of substrates. They present a low-tack surface which allows for easy readjustment. Adhesion to steel: 2.8 N/10 mm. On more difficult surfaces we would recommend using Spray Mount [page 114] to supplement the adhesive. Spray the substrate, not the vinyl film, and allow to dry before positioning. The face film is 65 microns, with adhesive it is 90 microns. The release liner is one-side coated 143 g/m² kraft paper. Available by the metre or in a 45.7 m roll.

It is possible to print on these films using screen print, digital print and offset inks formulated for pressure sensitive vinyl films.

MIRRORS

TEXTURED METALLICS

Carbon Fibre Galaxy DES0004

Matte Silver DES0006

Florentine Leaf DES0007

Fine Brush Silver DES0009

Textured Metallics

Highly effective representations of metallic processes. The Matte Silver is a good match for an acid etched surface while the Florentine Leaf would evoke a surface that has been worked into with a fine tool. The Fine Brush and Carbon Fibre Galaxy have a more industrial feel. Matt Silver and Fine Brush are sold in both 610 mm and 1.37 m widths.

ROSCO MIRRORS

Mirrors A variety of reflective surfaces in a metallised plastic format. Although the rigid mirror is certainly thicker than the thin mirror it is not exactly rigid - which is how we can sell it by the roll!

We would recommend Display Mount to glue smaller areas and Flints Cyclorama Glue [page 110] for larger areas. Care must be taken to ensure that the Cyclorama glue surface is smooth before applying the mirror. Rolling the wet glue with a damp short hair roller will assist. Please ask for a Rosco Designer Product swatch book.

Mirrors	roll size	code	price
Flexible Mirror	1.22 m x 9.15 m	ROS390602	£90.00

SILVER SHRINK MIRROR

Silver Shrink Mirror

This is a lightweight metallised plastic laminate which will create stunning mirror panels when correctly stretched. The mirror must be securely fixed to a rigid frame. We recommend a 3 x 1 mortise and tenon flat frame with an extra bevelled piece of timber glued and pinned to the face of the frame to raise the mirror clear. Care should be taken to carefully remove the arris on the bevel. Cover the bevel with a

continuous run of gaffer tape to further soften the corner.

When stretching the mirror apply small tabs of gaffer tape before stapling through into the wood on the side of the frame. Fix the centre of the long edge first then stretch this edge to the corners and then centre repeatedly until the staples are about 100 mm apart. Using a pair of canvas pliers [see page 68] can help to get a good stretch. Don't be afraid to prise up any staples where wrinkles occur and re-staple. Once content that you have a good even stretch, run a continuous run of gaffer tape over the mirror and staple every 25 mm down the long edge. Stretch the other sides using the same technique. Remember only finally gaffer once you are happy that there are no significant wrinkles. It is much quicker to re-staple than to attempt to shrink out large wrinkles. Ideally use a propane space heater and walk the flat frame past slowly about 250 mm from the machine. Don't stop! Keep moving the flat until the scrim is stretched tight providing a mirror-like finish. Heating can be accomplished with ordinary heat gun but care must be taken to avoid scorching. Note: Although we are assured that there has been no recent change to the manufacture of the Shrink Mirror, it does not appear to give the same brilliant optical definition that was achievable in the past. However, if done carefully, these shrink mirrors do make a smart looking mirror that will be light in weight and free of distortion.
