SCALE RULES AND DRAUGHTING

Scale Rules The college scale rule is our most popular rule and offers fantastic value. It has all the metric scales commonly used on theatre plans. The 415 is a small 6" flat rule which fits easily in the pocket. The 305 is the professionals choice as it is engine divided and has coloured stripes to quickly identify the scale and is supplied in strong triangular storage boxes.

METRIC/IMPERIAL CONVERSION CALCULATORS

Instant conversion of imperial fractions to metric

Construction Master Pro V3 Not just an ordinary calculator! This immensely useful machine is an advanced feet-inch-fraction calculator with instant metric conversion. If you are working from imperial drawings you

can instantly find out how many square metres in a 16' $3^{13}/16$ " \emptyset revolve. The perfect calculator for production managers, scenic carpenters and engineers, draughtsmen and women, scenic artists, stage managers and anyone who works backstage. Highly recommended with proven hard service.

- ✓ Instantly converts imperial/metric including fractions up to $1/64$ "
- ✓ Includes metric and imperial cubic conversions.
- ✓ Enter the diameter of a revolve in feet or metres and it calculates the area and circumference in single keystrokes.
- ✓ Finds the arc length of a portion of a circle.
- ✓ Works out stair calculations.
- ✓ Complete rafter and framing solutions.
- ✓ Finds volumes of cylinders.
- ✓ Even works out number of bricks in a wall.
- ✓ Complete with easy to use field guide plus full instruction booklet and rugged hard case for protection.

PAPERS

Bogus Paper Bogus paper is a recycled versatile, multipurpose, economical grey paper that provides great absorbency. It has a slightly rough but soft finish. Since it absorbs so much moisture it is a fantastic product for covering paint floors prior to laying out cloths.

- ✓ Avoids water pooling up under gauzes and helps to prevent stains caused by fire proofing chemicals.
- ✓ Protects your paint floor from textures and stains.
- ✓ Aids drying time of cloths.
- ✓ Lays out flatter than polythene sheeting [see page 3.63].
- ✓ Extra wide size 1828mm [72"] and heaviest weight available!
