

# FLUORESCENT PAINTS & POWDERS

## A note on fluorescent paints

To make really vibrant colours the manufacturers must use very pure pigments without bulking agents or fillers. For this reason the obliteration power of all fluorescent paints is poor so we highly recommend using a white basecoat.

## ROSCO VIVID FX FLUORESCENT PAINT

### Rosco Vivid FX Fluorescent Paint

A remarkably vivid range of clean and pure colours that bring a new depth to fluorescent paints, with colours so intense that they give an extra dimension to your designs. The range contains 13 colours, which can be intermixed to obtain intermediate colours. They can be used on most scenic surfaces with

one or two coats. As with all fluorescents, apply onto a white basecoat. Water-based. The printing process used in this catalogue cannot do justice to these bright colours and as Rosco Colour Cards are no longer made with real paint, please use a starter kit ↴.

SPECIFICATION: Covers 8 - 9 m<sup>2</sup> per litre.

## BRISTOL WATER-BASED FLUORESCENT PAINT

**Bristol StandTex Fluorescent Palette** Water-based non-toxic UV reactive paints which are ready to use. They can also be intermixed to provide an infinite range of shades. Fluorescent paints should

always be applied onto a white base. For UV Lights see page 339.

## HAUSSMANN WATER-BASED FLUORESCENT PAINT

**Haussmann Visible UV Paint** High quality fluorescent paints. Highly inter-mixable

and water-dilutable. As with most fluorescents they are best applied neat onto a smooth white painted surface, but also suitable for use on primed fabric surfaces. See the invisible versions on the next page.

Visible Ultraviolet Paint	code	1 litre
HatoTex Visible	PAT342XX	£38.00
Visible UV Paints Test Kit	code	price
8 x 40 ml pots	PAT34200	£38.00

**ROSCO FLUORESCENT PAINT**

**Rosco Fluorescent Paint** Vivid vinyl acrylic colours that will fluoresce under ultraviolet or black light. Invisible Blue is milky under normal light and fluoresces light blue. Inter-mixable with the Off Broadway range it will brighten these colours. For maximum effect fluorescents are best applied onto a white surface and may be used to paint virtually any substrate including canvas, wood, plaster, various plastics and metal. For UV Lights see page 339.  
SPECIFICATION: Covers 8 - 9 m<sup>2</sup> per litre.

**INVISIBLE UV PAINT**

**Hausmann InVisible Ultraviolet Paint** Produces high quality fluorescent effects which are invisible in normal daylight.

Under UV light, however, they burst forth from obscurity with radiantly luminescent colours – their words, not mine! They can be applied to many different surfaces such as fabric or wood by brush, roll or spray. A Test Kit is available with one of all the colours. The drying time depends on the prevailing temperature and humidity. At 20°C, the setting process is largely completed after approximately 24 hours. See also the visible version on the previous page.

**FLUORESCENT POWDERS**

**Flints Fluorescent Powders** Very pure and vibrant. They have not been heavily bulked up with chalk like many of the powders on the market. The pigments are neatly packaged in plastic tubs. To make up into a paint, firstly add a little water or ideally Flints Dispersant [page 21] to the powder and mix into a thick paste. It is best to leave the paste to stand for as long as possible, ideally overnight, before adding emulsion glaze to achieve your ideal consistency. For large jobs a hand drill with a paint mixer will speed things up. As with all fluorescent paints, they are best applied onto a white basecoat. 1 kg will make around 10 litres of very intense paint.

Now available in 100 g pots!

**Note about UV Light** Both the LED UV Light and the Non-LED Floodlight [page 339] work well with the Flints Fluorescent Powders. The Peacock Blue\* and Violet\* are included to provide a complete range of colours however these colours will never really fluoresce like the others but are just very vibrant.

Fluorescent Powders	code	100 g	code	1 kg	5+
