

GLITTER

This page was updated 23/09/11

Glitter Our range of popular non tarnishing plastic glitters are non abrasive and non toxic. They are packed in convenient clear 250g shaker pots although large quantities may be supplied loose packed. PVA glue or glaze provides satisfactory results for most applications but for really tough high wear areas try using Rosco CrystalGel [see page 1.38]. We supply our standard glitters as small jewels approximately 0.75mm across and squares approximately 3.2mm across. We also stock very fine polyester glitters. If large quantities are needed at short notice we may have to add an air freight surcharge. We normally hold stocks of over half a tonne. 500g covers very approximately 1 square metre. For confetti and big glitter squares see pages 1.24.

The full range of colours can be seen on our website flints.co.uk

SPECIAL GLITTERS AND MICA FLAKES

Opalina Snow This transparent slightly iridescent glitter is randomly cut to provide an irregular appearance. It can be added to marble dust [see page 1.15] or M11 crystals to provide a crystalline frosted snow effect or just use it by itself for an interesting surface. See also page 1.64 for artificial snow.

Opalina Random Cut Snow	code	100g	500g
	GLI062	£3.50	£15.50

Mica Flakes Mica is an inert complex silicate that forms naturally in thin transparent layers. It makes an interesting sparkling decorative finish which can be easily fixed by sprinkling onto wet PVA adhesive or glaze. We supply it in 500g tubs.

Mica Flakes	code	500g
Silver	DPP058	£9.80
Black	DPP059	£9.80
Gold	DPP060	£9.80

Also see Pearl Lustre Powder page 1.14, Metal Powders page 1.21.

DISCO AND PARTY
