NON-SLIP FABRIC TREATMENTS

Weave Filler 916, & 916 SE [Flame Retardant]

These weave fillers are highly elastic materials which are primarily designed to fill open weave textiles such as scenic gauzes and strawberry netting. They are also widely used to provide a reliable non-slip surface to the underside of rugs, druggets, carpets, stage cloths etc. They enable scenes to be quickly set because cloths will flop down and grip the stage floor without needing tacking out or taping. Also useful to prevent fraying to

cloths. The flame retarding chemical used in the 916 SE flame retardant version may discolour some dark coloured materials so please undertake a test before using. Also, the 916 SE flame retardant version is only available in 10 kg size and has a 6 month shelf life, so please buy as required.
