

Flints stocks a wide range of bolts and set screws. The most popular sizes are listed here. Our distributor holds thousands of tons of stock so if you can't find the item you need, give us a ring and we will order it for you. The bolts and set screws are all Grade 8.8 high tensile. They conform to DIN933 [set screws] and DIN931 [bolts]. Set screws are simply fully threaded bolts. All the bolts and set screws we stock are zinc-plated, we can get self-colour in next day if you require. Zinc-plated bolts are ideal for touring shows as your crew can keep their hands clean and avoid making nasty marks on the white felt flats [see White Cotton Gloves page 323]. Flints can also supply bolts and sets in stainless steel [A4 and A2], please phone with your requirements.

M6 SET SCREWS & BOLTS

Steel Nylon Insert Nuts DIN 982 Type P [Nyloks]

A nut with a plastic insert which deforms on the thread increasing the friction and applying a compressive force which effectively prevents the nut from working loose. There is some debate as to whether these nuts should be re-used. Certainly after a few uses the effectiveness can be felt to be reduced. They are not suitable in temperatures above about 120°C when single coil or shakeproof washers are preferred.

The M4 size is DIN 985 Type T. Bright zinc-plated.

COACH BOLTS

Coach Bolts [Carriage Bolts] DIN 603/555 Intended as a fixing for a wooden surface, either wood-to-wood or wood-to-metal.

The bolt is applied to the pilot hole and the nut, when tightened, draws the square section shank into the hole and locks it in, leaving a simple domed-head finish. To reinforce holes when bolts are being used repeatedly use our special Bolt Plates [page 132]. Our coach bolts are bright zinc-plated.
