## STARRETT JIGSAW BLADES

**Starrett Unified Shank Bi-Metal Jigsaw Blades** These Starrett blades impressed us so much during a demonstration that we decided on the spot that we had to stock them. We would highly recommend that you try them. ✓ Unified shank fits all jigsaw machines ✓ Unique bi-metal technology joins the steels by solid state diffusion bonding ✓ Unbreakable during normal use ✓ Typically lasts 25% longer than directly competing products ✓ 170% greater resistance to tooth breakage ✓ Each blade performs many functions so fewer types are needed

**Reciprocating Sabre Saw Blades** These bi-metal blades fit DeWalt, Bosch, Black and Decker, Hitachi, Metabo, Makita and Skil. The metal cutting blades will swiftly cut through metals 1.5 - 10 mm thick including non-ferrous, pipe conduit, steel sheet and stainless steel. The wood, and metal/wood [nail embedded] blades will rapidly cut wood 5 mm and thicker. See page 257 for the 18 V cordless DeWalt Reciprocating Saw.

## FLAT BITS

### Irwin Flat Drill Bits

These are the longest lasting and fastest boring flat bits made. The extended spurs scribe the hole while the patented micro groove point gives faster, cleaner cutting. The hex shank fits any chuck over 6.5 mm. Designed to be used at speeds over 1,000 rpm.

- ✓ Will bore twice as fast as any other flat bit
- ✓ Will stay sharper and last 3 times as long as other flat bits

## SETS OF SCREWDRIVER BITS

**Stanley 7-Piece Bit Set** The lid of the plastic case twists to allow access to the bits.  
 Supplied in a case with: magnetic bit holder, PH1, PH2, PZ1, PZ2, slotted 0.8 x 5 mm, 1.2 x 6.5 mm.  
 7-Piece Bit Set code price  
 STA168737 £8.74

**WERA Bit-Check® Diamond Bi-Torsion Rapidaptor** The ultra flat construction of the Bit-Check® case has proved hugely successful. The push button allows the case to swing out providing easy access to the bits and holder. Special tempering of the

bi-torsion bits allows higher peaks to be absorbed in the torsion zone. The blade itself also has a bi-torsion zone to absorb the impact of load peaks. The Rapidaptor bit holder allows bits to be quickly fitted by just inserting in the holder. Guaranteed secure and wobble-free. Release by pushing the clamping sleeve forward. Both one-handed operations. The outer sleeve is free-spinning to give an additional grip point. The bits are coated with thousands of particles of diamonds which bite into the screw head dramatically reducing the chance of cam out – a great advantage when working near delicate surfaces.

Supplied in a Bit-Check® case with: 1/4" x 75 mm Rapidaptor, 25 mm bits: slotted 5.5, 6.5 mm; Phillips PH1, PH2, Pozidriv PZ1, PZ2.

## QUAD-DRIVERS AND SNAPPY FLIP OVERS

**Makita Quad-Driver** The Makita Quad-driver is a popular accessory for driver drills with carpenters who appreciate the speed saving of this clever device. The Quad-driver will drill a pilot hole, countersunk, counterbore in one operation and by reversing the bit holder it will drive the screws home.

Makita Quad-Driver	for screw size	code	price

## PLUG CUTTERS

**Plug Cutters** For cutting plugs from off-cuts of timber to make a perfectly grain matched plug. Made from tool steel. Can be used in Snappy Chucks or directly in a standard chuck – ideally in a pillar drill. They produce 9.5 mm [3/8"] or 12.7 mm [1/2"] plugs. See the Trend Snappy Countersinks [page 271] for producing the perfect matching counterbore.

## TREND ROUTER BITS

**Trend Router Bits** Designed for the most demanding applications in manufacturing and woodworking trades. These router cutters have the body and shank machined from high-grade steel, but with tungsten carbide tips brazed onto each flute. They are more durable than HSS cutters, although they cannot be honed to such a sharp edge. Designed for cutting the most abrasive materials, under normal conditions they will outlast HSS-grade cutters by many times over. They are able to keep their cutting edge more efficiently and preclude the need for constant re-sharpening.

**Two Flute Cutters** TCT for abrasive materials such as chipboard, MDF, plywood, hardwoods and hard plastics. Two-flutes give a clean finish to cut edges. All cutters above 9.5 mm diameter have TCT plunge centre tips.

**Trimming Cutters** The self-guided trimmers with bearings mounted on the end of the cutter are typically used for trimming laminates or skin ply cladding to frames. Note: The template profile cutter has the bearing at the top of the cutting blades allowing the user to accurately follow templates.

**Biscuit Jointer Set** For biscuit jointing of timber, man-made fibre and particle board with the router. The set includes three sizes of bearings which set the correct depth of cut for the three sizes available. A slightly longer cut than the length of the biscuit is required to allow some lateral play for easy alignment

during assembly. A water-based glue [PVA] is used with the biscuits which will expand as the moisture is absorbed. Boards are simply clamped together until glue is cured. For larger boards, biscuits can be doubled up by making two passes. Enables biscuit jointing with timber, man-made particle board. The correct choice of bearing will ensure the correct depth of cut for biscuit sizes No.0, 10 & 20.
