

ROSCO SUPERSATURATED PAINTS

Our biggest selling range of scenic paint

Rosco Supersaturated Paint

Specifically designed to offer the scenic artist a matt non-reflective medium that can be used indoors or outdoors. It will adhere to most modern scenic surfaces, the acrylic base ensuring that it will not crack. The paint is conveniently packaged in a concentrated form that saves storage space. This can be particularly helpful for freelance scenic artists who may need to transport a wide range of colours

in their car. The paint provides the versatility of dry pigment with the permanence, ease of use and flexibility of acrylics.

Rosco Supersaturated Paints can be used direct from the pot for maximum obliteration, but they are really designed to be diluted at least 1:1 with water. They can be further diluted up to 15:1 to provide watercolour washes and dye effects. If you are heavily diluting the paint but want to use it on a difficult surface we advise that Rosco Neutral Base [page 6] is added to reinforce the binding power. Indeed Neutral Base can be added to Rosco Supersaturated to paint items such as brass door furniture where most paints would fail to adhere. When used to paint cloths, Rosco Supersaturated has the advantage over other paints in that it remains supple allowing the cloth to be rolled or folded without cracking. It is this flexibility that makes Rosco Supersaturated the preferred choice of virtually every major theatre paint shop. The paint can be easily flame retarded by the addition of Rosco Flamex PA [page 59]. Once diluted 1:1 the paint will cover approximately 8 - 10 m² per litre making it very good value.

ROSCO WHITE BASE & VELOUR BLACK

Rosco White Base A concentrated vinyl acrylic emulsion with a titanium dioxide filler. For priming new canvas dilute in ratio 2:1 water to base, which will give a good surface to take colour etc. A 6:1 prime will create a more absorbent surface for watercolour effects, while 1:1 should be used to prime old paint surfaces.

SPECIFICATION: Covers 8 - 10 m² per litre.

Rosco Velour Black Use in the same way as the Rosco Supersaturated Paints. When diluted 1:1 it will provide an intense matt black permanent velvet finish. In Flints' tests Rosco Velour Black proved to be one of the blackest paints available with the advantage of remaining flexible and strong. It can be further diluted like the other supersaturated paints. SPECIFICATION: Covers 8 - 10 m² per litre.

 'Mostly nameless colours,
 Colours you'd like to see; but one was puce
 Or perhaps more like crimson, but not purplish.
 Some had no colour.'

This beautiful 2 x 3 metre canvas was painted using Rosco products by Scenic Artist Chris Clark to create the look of an old oil painting for the recent Donmar Warehouse production of 'Les Liaisons Dangereuses'. Designed by Tom Scutt, the painting depicts the story of Diana & Actaeon. As Diana is bathing, she is disturbed by huntsman Actaeon and she immediately turns him into a stag. The allegorical painting was prominently displayed during the first act and served to emphasise the storyline of treachery which developed between the characters on stage.

A note on fluorescent paints

To make really vibrant colours the manufacturers must use very pure pigments without bulking agents or fillers. For this reason the obliteration power of all fluorescent paints is poor so we highly recommend using a white basecoat.

ROSCO FILM AND VIDEO PAINTS & TAPE

Rosco DigiComp HD Paint Use for digital compositing. The pigments found in these paints produce the right spectral reflectance and high-gain reflectivity to produce the narrow bandwidth of green or blue needed for clean separation of foreground and background. Simple to light and easy to key, with less tidying up in post production.

ROSCO TOUGH PRIME

Rosco Tough Prime A unique water-based primer with special adhesion properties which allow it to bond onto hard-to-prime materials, including PVC pipe, aluminium and

plastics, as well as muslin, wood and foam core. Dries to a tough, durable coating that can be over painted. Although touch dry in half an hour, this paint will require between 24 and 48 hours to fully cure to its maximum strength. Suitable for indoor and outdoor use.

SPECIFICATION: Covers 9 - 10 m² per litre.

Other Rosco Priming Products

White Base is ideal for priming canvas cloths as it remains supple, can be heavily diluted for wash effects, or diluted less to obliterate old scenic paint. For full details see page 2.

Crystal Gel is not really a primer but it sticks like mad to almost anything including tricky surfaces such as polycarbonate sheet. It can be dyed with water-based dyes or food colouring or mixed with glitter to produce a tough interesting effect. For full details see page 56.

Flexcoat can be used to paint soft foams. It does not become brittle with age. Mix it with foam granules for a great soft texture effect. For full details see page 54.

ROSCO GLAZES

Rosco Glazes These great glazes are listed in detail in the Glazes Section of this catalogue [page 48].
