GLITTER SPRAYS

Glitter Sprays These convenient aerosol sprays deliver a very fine glitter finish fast. Because the glitter is very fine they are possibly more suited to close up display work rather than for use on stage. The aerosols listed here are, of course, CFC free. Coverage from a 400ml can is around 2-4 square metres.

Dirty Down Specials

Three great new sprays to simplify your set dressing. A light spray from the **Frost/Snow** can will give a gentle frost effect but a harder spray creates thick frost or snow. The **Rust** effect works best on metals but it can be sprayed onto paper etc just like the ageing sprays [see also iron powder page 1.21]. The **Mould** is like bread mould but with some thickness as if it is growing out of the wall etc that it is sprayed onto. Use it to reduce the exorbitant rent your landlord charges you on your flat.
