

STAGING

Flints has over twenty years of experience in supplying and hiring staging systems. Unlike the individual manufacturers, we can offer impartial advice on all makes of staging including RATstands' SpeedDeck, Doughty's Easydeck and the aluminium Nivoflex systems, as well as the Steeldeck and Stagebase we list below. Requirements vary widely, from systems that can be handled by school children to decks that can withstand the rigours of touring. Flints can offer independent advice so that you get the system best suited to your needs.

STEELDECK

Steeldeck The most popular staging system used in theatres. It is strong, quick to rig, and easy to handle. The decks that we supply are the original Steeldeck invented by Philip

Parsons in 1986. The load capacity has been independently verified by structural engineers. The Steeldeck rostra uses steel or aluminium scaffolding tube for legs. Complex structures can be designed by bracing the legs with standard scaffolding components. Tiered seating can be accomplished by overlapping the units. Units can be wheeled by purchasing a set of scaffold castors ➡ . These wheeled units make handy storage trolleys for storing your decks and are widely used for shifting heavy gear during theatre get-ins. There are endless ways to use Steeldeck from rock concerts, choir tiers, raked stages and Santa's sleigh to banqueting tables and production desks. Overall height of deck including top is 180 mm. Steeldeck is rated at 7.5 kN/m². The frames are painted black but the tops are unpainted plywood. See page 12 for Flints Theatre Black Paint or have them painted – see price option below.

STEELDECK

Stagebase is a staging system similar in principle to the famous Steeldeck but with a much simpler construction. The maximum size of these units is 2 m x 1 m making them perfect for the smaller venue. At 120 mm

deep the units take up less storage space than Steeldeck. This system is a great choice for clients who want all the versatility of Steeldeck but at less cost. Stagebase is rated at 5 kN/m². A 2 x 1 m unit weighs 40 kg. For leg prices see other column ➡ .

- ✓ Lighter to move and easier to store
- ✓ Economical solution with no compromise to performance

LEGS

Legs We list a selection of the most popular leg heights which we sell as sets of four. Each leg will have a plastic insert in one end and comes in steel or aluminium. Legs can be cut to any height. For tube cutting prices visit page 211.

To achieve a certain overall deck height, the legs need to be shorter by the following amounts:

Steeldeck	30 mm*	Stagebase	30 mm*
Megadek®	33 mm*	SpeedDeck	28 mm*

*These measurements allow for the 5 mm used by the plastic insert. When ordering please make it clear whether the dimension you give is the overall deck height, the leg height including the end stop or the actual tube cut length.

Set of 4 Legs for Height	code steel	price	code ali	price

Multi-Leg Adapter can be used where four legs would normally meet allowing just one leg to be used. This provides two major advantages. Firstly, one adjustable foot can be utilised allowing the staging to be used on uneven ground.

Secondly, cross bracing can be clamped onto the single leg with traditional scaffolding clamps. [Although Rotalock will work with clustered legs, see page 214].

ACCESSORIES

Scaffold Castors Flints stocks the versatile plug-type scaffold castor which is suitable for converting steel rostra into slave trucks [with the addition of a short scaffold sleeve if going directly into the rostra corner post]. Fitted with strong Nylon wheels. The unbraked versions are

fitted with a wind-in bolt to prevent the wheel from turning when positioned. The much preferred braked versions are fitted with an easy to use kick down wheel and swivel lock. [The picture shows the 125 mm version]. The plug sizes: 125 mm version 64 x 38.35 mm, 150 mm version 127 x 38.1 mm.

HIRE

Flints Standard Handrail Units

These units comply with the stringent regulations requiring a strength of 3 kN, a height of 1,100 mm

and for no gap to allow a 100 mm sphere to pass through. They are drilled to fit both Steeldeck and Megadek systems. They were designed to speed up hire jobs which often have handrail requirements. Available in 4 ft, 3 ft and 2 ft units [all for 4 ft decks] with joint clips to suit straight joints/outside corners or inside corners. Black power-coated finish. The 2 ft and 3 ft sections are handed [as you look up the tier] for use on overlapped tiered seating. See page 363 for hire details.

EASYDECK

EasyDeck is a modular performance system suited to the smaller venue. It is a "no fuss" system, which is simplicity itself to install and requires no special tools to assemble.

- ✓ No tool assembly
- ✓ Easily managed by one person
- ✓ Reversible deck panels from a renewable source
- ✓ Black powder-coated finish
- ✓ SWL 500 kg per m²
- ✓ 1 m and 750 mm square options
- ✓ Conforms to DIN 53799, BS 6566:1985, BS 3755:1964 and are made in accordance with ISO 9001:1994 quality assurance systems.

NB: Panels are sold separately to the frames. For the full range see flints.co.uk
