SKATE WEIGHTS

Weight Skate XL

Flints is synonymous with Stage Weights but we haven't ever stocked anything to help you move them around... until now! The Weight Skate is designed to carry up to 24 stage weights with a welded steel frame that weights neatly stack into. Think of this like a very fancy and much safer dolly. The frame extends on two sides for you to have a two handed grip whilst manoeuvring. Great for moving weights around but also a compact weight storage frame with heavy duty braking castors and a black finish, so can be discretely stowed away backstage. The Weight Skate can also be customised with your own logo if you wish, please get in touch with us for a quote!

PANEL CARRIERS

Panel Carrier – The Original

Transforms lifting heavy panels into an effortless task due to a clever ergonomic design. The cams quickly [and gently] lock onto any panel up to 65 mm thick at a comfortable handling height. This prevents having to bend down to get your fingers under heavy panels and saves your back from undue strain. The comfy handgrip protects your hands from sharp edges and splinters. This particular design can also grip the top of narrow panels which panel lifters, with a single central leg, are unable to do.

Supplied in a box with: two handles. Red rubber handle.

PLANKFORM™

Shorten the legs for a bench to sit and have a cuppa.

PlanKForm™

Alasdair Flint's brainchild, PlanKForm™, spawned from a need for trestle tables which could be stored in a small space, be transported easily, and have endless uses. Simply slot a scaffolding board of your desired length [38 mm x 225 mm] through two PlanKForm™ units and it will transform your plank into a platform. The legs are simply four scaffolding tubes of the same length. You can create anything from a low bench to a 7' frame for a swing.

- ✓ Easily fits in the boot of your car
- ✓ Extremely versatile! Use any length of scaffolding plank and tube
- ✓ The horizontal bar between the sockets is perfect for hanging items like tools or a paint kettle
- ✓ Wingnuts threaded into the sockets keep the trestle secure and stable.
- ✓ Create multiple trestles to create a supporting surface to work on.

Available as just the PlanKForm units alone, or as a kit to make a work surface as shown above measuring 900 mm high, 985 mm long, and 225 mm wide. The kit includes:

- ✓ 1 pair of basic units [1 per end]
- ✓ 4 x 900 mm size 8 Aluminium Scaff legs [complete with end caps]
- ✓ 1 x Scaff board [38 x 225 x 985 mm]

VIKING ARM

Viking Arm

This reversible squeeze trigger clamp that can be used to pry things apart or forcibly bring them together. Used in the construction industry for the installation of windows and doors we think this ingenious tool is great for levelling decks and installing castors. Each arm has 150kg lifting capacity so if set on 4 corners it's a powerful squeeze trigger jack. To reverse simply unscrew bolt at the top of the clamp and reverse the handle. There are also 2 options for release of the clamp, full release or a gradual allowing for fine adjustment both release buttons are located at the back of the handle. This is the original Norwegian-made tool and not to be confused with cheap knock-offs.

MAGNETIC SWEEPERS

Magnetic Sweeper

This is a neat wheeled magnetic sweeper with a telescopic handle capable of collecting up to 20 lbs of magnetic items. Ideal for collecting tacks after stage cloths have been changed. Use it around the workshop to recycle or sort out dropped screws and nails. Run it over the stage after the fit-up to ensure nuts, nails, washers, swarf and filings do not cause damage to scenery tracks or equipment such as solenoids as well as safeguarding against injury to stage staff, actors' or dancers' feet. A great value piece of stage equipment. We're really impressed with this new version.

RAM BOARD FLOOR PROTECTION

Ram Board Floor Protection

Recycled & recyclable, heavy duty floor protection.

Ideal for protecting floors while loading in & out, you can even drive a forklift over it. A great sustainable alternative to plastic correx sheeting, with the added convenience of being able to roll it up and reuse it endlessly. Ram Board is water resistant, protecting floors from spills but as it is a cardboard and paper product it provides breathable protection. This means it can be laid over floors that are dry but still need time to cure. Plastic protection can inhibit this process. Ram board is scored along three spaced lines throughout the length of the roll to enable you to fold it up against walls and corners easily.

Top tips for installation

- Always use logo side up
- When you have laid out the Ram Board, crush the ends horizontally by folding it back on to itself, then place a foot in the centre of the roll and pull up to crush vertically. This should prevent the ends from curling up.
- When joining lengths of Ram Board ensure to overlap a couple of inches.
- Can be joined with any tape but Ram Board Seam Tape is 3" wide (PATRMBTAPE) giving you enough purchase on both sides to ensure a fully protected seam.

Flints now stock a wide selection of more sustainable, recycled & recyclable, paper based alternatives to polythene sheeting/correx.

- For light masking, short term floor protection, see 'Bogus Paper'.
- For medium duty floor protection, see 'Trimaco X Board'.
- And for heavy duty applications see 'Ram Board'.

Bogus Paper

Bogus paper is a recycled versatile, multipurpose, economical grey paper that provides great absorbency. It has a slightly rough but soft finish. Since it absorbs so much moisture it is a fantastic product for covering paint floors prior to laying out cloths.

- ✓ Avoids water pooling up under gauzes and helps to prevent stains caused by fireproofing chemicals
- ✓ Protects your paint floor from textures and stains
- ✓ Aids drying time of cloths
- ✓ Lays out flatter than polythene sheeting.
- ✓ Extra wide size 1,524 mm [60"] and heaviest weight available!

CORROSION PREVENTERS**Boeshield T-9**

Our customers suggested we stock this product. Developed by the Boeing Company, and originally intended for use on metals under threat from rust and corrosion, Boeshield can be used on paint, plastic, rubber, fibreglass or vinyl. It penetrates crevices deeply, displaces moisture, dissolves minor corrosion and leaves a clean, waxy coating with long-lasting durability. For backstage use, it provides a waterproof film which is non-sticky, doesn't leave an oily residue and is non-conductive so is handy to use around lighting and electrics. Also suitable for outdoor events such as festivals, concerts or open air performances where you want to protect your rigging and tools from the inevitable rain. You can rinse off sand, dust and mud with water leaving the Boeshield coating intact. 340 g aerosol can.

FLAMMABLE STORAGE CABINETS**Double Door Flammable Storage Cabinets**

These cabinets are of welded construction using 0.9 mm thick steel powder coated in high visibility yellow. They have the appropriate warning label attached. The handle is strong and chromeplated. The cabinets come with adjustable perforated spillage trays and a lift-out sump in the base. Perfect to store your Methylated and White Spirit [page 69].

Large Size 1,830 x 915 x 459 mm [HxWxD] supplied with three spillage trays and one base sump.

Small Size 712 x 915 x 459 mm [HxWxD] supplied with one spillage tray and one base sump. NB: 15 days lead time for delivery. Check flammable storage cabinets carefully before accepting delivery. If you don't and there is damage our supplier will not replace it free of charge.

Flammable or Inflammable?

They mean exactly the same thing. The "in" is from Latin like enflamed. Please don't think inflammable stuff won't burn - it will!

ZARGES 3-PART SKYMASTERS

Zarges Trade 3-Part Skymasters

The Zarges Trade Skymaster Ladder is the standard type of ladder for performance venues. It is immensely versatile, you can use it as a three-part extension ladder, stepladder, free-standing two-part extension ladder or stairway trestle, etc. It's ideal for getting to studio grids, awkward lighting positions, over seating, up the back of scenery etc. It's also a great tool for the maintenance engineer, for corridor and stairwell lighting, difficult to reach windows and plants.

The Skymaster comes in seven sizes: 6, 7, 8, 9, 10, 12 and 14 rung three-part ladders. The 8, 10, 12, and 14 rung ladders are available as industrial versions on our website – see flints.co.uk. The Industrial type are fitted with twin locking bars and wheels on the top section. Each ladder comes with a stabiliser bar and one locking bar to lock the ladder in the closed position for ease of transportation. Flints' prices are well below list price. See the next page for accessories, including raked stage adapters.

Conformity: EN 131 approved to 150 kg. Delivery prices: UK mainland £15.00 [3 day] £25.00 [next day].

* = also available as Industrial version - see our website for more details

Falls from Height

Figures from the Health and Safety Executive show that falls from height is the most common category of fatal injury at work in the UK, with many of these involving ladders. They make up a much smaller proportion of non-fatal injuries, which we take as meaning that when things go wrong with ladders, they go really wrong.

Please take care and follow the ladder safety tips below.

Top Ladder Safety Tips

- ✓ Daily pre-use check – feet included. Do not use damaged ladders
- ✓ Lean ladders at the correct angle: 1 out and 4 up
- ✓ Maximum permissible load: 150 kg [check with each model]
- ✓ Check restraint straps are tensioned and locking bars are in place
- ✓ Lean-to ladders must end 1 m above level of access
- ✓ On multi-part ladders use the rung lock devices
- ✓ Never erect on slippery ground
- ✓ Do not lean to the side when working from a ladder. Ensure your belt buckle [navel] stays within the stiles and keep both your feet on the same rung
- ✓ Do not lean against an unsafe bearing point
- ✓ Do not stand beyond the fifth rung from the top on multipurpose ladders or the fourth rung on lean-to ladders
- ✓ Do not climb from step ladders to a higher level of access
- ✓ Short duration work [maximum 30 minutes]
- ✓ Light work [maximum 10 kg]
- ✓ Keep three points of body contact always on the ladder
- ✓ Always secure your tools with a Lanyard [page 357]

ZARGES HOP-UP WORK PLATFORM

Zarges Hop-Up Work Platform

Although this platform is small it is fantastically useful. Place one next to you while you paint a wall to put your paint pot on while you stand and work. For the lower areas just sit on it rather than bending your back, then stand on it for the higher areas to save stretching. Take it into the yard to sit in the sun while you have your deserved cup of tea. It doesn't look very impressive but you will love it! Lightweight, but durable, made from aluminium with steel locking hinges. Compact and easy to store when closed. Standard delivery terms apply. Now available in a double width version!

FLEXIBLE LADDERS

Fibreight Ladders

A black polyester webbing ladder with carbon fibre rungs providing a silent ladder suitable for occasional use. Supplied complete with bag and connector. Sometimes used for emergency mast climbing at sea.

Flexible Ladders

These can be useful for access to front of house trusses but should never be used without back-up fall arrest equipment [see the ASAP Lock on page 358]. We suggest using the 6" wide version with 10" rung spacings which are considered the easiest to climb. The 4 mm wire ends have a tested quick link termination which enables ladders to be joined with standard rung spacing. Also available with black rungs POA.

TALLESQUES

Tallesques

For so long the standard access tool for the entertainment industry, the Tallesque gives you easy access to work on rigging, electrics, draperies, and sound etc. This compact and manoeuvrable all aluminium work platform allows access to working heights up to 9.5 m [31']. The twopart ladder section is operated by pulling a simple rope line, which allows a rung by rung height adjustment. The ladder section pivots over allowing the unit to pass through a standard doorway and for low level storage. Three standard models are available and they all are now supplied with supplementary safety kit [four outriggers etc.] as set out in the ABTT Code of Practice COP012: For the Use of Tallesques for Working at Height in Theatres. 12 month warranty. Conformity: EN 1004

SCISSOR LIFTS

Scissor Lifts

A useful range of small scissor lifts originally designed for lifting TV and video screens but ideally suited for product reveals and stage effects. A twin power socket can power electrical equipment up to a maximum 350 W each. The raised height can be lowered by a maximum of 160 mm using a micro switch. It is also possible to install an optional radio remote control which works at a range of 10 – 15 m. High quality German manufacturing with a two-year guarantee. NB: Please ensure the instructions are carefully followed before installing the lift. Take care to ensure shards, grit, metal filings etc. are kept clear of the worm shaft. Always lift the unit by its base frame. The standard length of cable to the rocker switch is 1.8 m. Flints holds the popular Model SLTE in stock. The other lifts will have a four week lead time.

Flints has over thirty years of experience in supplying and hiring staging systems. Unlike the individual manufacturers, we can offer impartial advice on all makes of staging including RATstands' SpeedDeck, Doughty's Easydeck and the aluminium Nivoflex systems, as well as the Steeldeck and Stagebase we list below. Requirements vary widely, from systems that can be handled by school children to decks that can withstand the rigours of touring. Flints can offer independent advice so that you get the system best suited to your needs.

STEELDECK

Steeldeck

The most popular staging system used in theatres. It is strong, quick to rig, and easy to handle. The decks that we supply are the original Steeldeck invented by Philip Parsons in 1986. The load capacity has been independently verified by structural engineers. The Steeldeck rostra uses steel or aluminium scaffolding tube for legs. Complex structures can be designed by bracing the legs with standard scaffolding components. Tiered seating can be accomplished by overlapping the units. Units can be wheeled by purchasing a set of scaffold castors. These wheeled units make handy storage trolleys for storing your decks and are widely used for shifting heavy gear during theatre get-ins. There are endless ways to use Steeldeck from rock concerts, choir tiers, raked stages and Santa's sleigh to banqueting tables and production desks. Overall height of deck including top is 180 mm. Steeldeck is rated at 7.5 kN/m². The frames are painted black but the tops are unpainted plywood. See page 10 for Flints Theatre Black Paint or have them painted – see price option below.

Stagebase

Stagebase is a staging system similar in principle to the famous Steeldeck but with a much simpler construction. The maximum size of these units is 2 m x 1 m making them perfect for the smaller venue. At 120 mm deep the units take up less storage space than Steeldeck. This system is a great choice for clients who want all the versatility of Steeldeck but at less cost. Stagebase is rated at 5 kN/m². A 2 x 1 m unit weighs 40 kg. For leg prices see other column.

✓ Lighter to move and easier to store

✓ Economical solution with no compromise to performance.

The system could not be simpler – just choose your Stagebase units then select your leg heights from the section below.

LEGS

Legs

We list a selection of the most popular leg heights which we sell as sets of four. Each leg will have a plastic insert in one end and comes in steel or aluminium. Legs can be cut to any height. For tube cutting prices visit page 248.

To achieve a certain overall deck height, the legs need to be shorter by the following amounts:

Steeldeck 30 mm* Stagebase 30 mm*
Megadek® 33 mm* SpeedDeck 28 mm*

*These measurements allow for the 5 mm used by the plastic insert. When ordering please make it clear whether the dimension you give is the overall deck height, the leg height including the end stop or the actual tube cut length.

Multi-Leg Adapter

This can be used where four legs would normally meet allowing just one leg to be used. This provides two major advantages. Firstly, one adjustable foot can be utilised allowing the staging to be used on uneven ground.

Secondly, cross bracing can be clamped onto the single leg with traditional scaffolding clamps. [Although Rotalock will work with clustered legs, see page 253]. Designed to fit standard Steeldeck.

code	price
SDMLA	£33.00

Adjustable Scaffold Foot

Useful for levelling staging legs on uneven ground such as thrust stages landing on raked auditorium floors. When used outdoors on soft ground they are best mounted on scaffold boards. If you have a cluster of legs together why not buy a Multi Leg Adapter above. They allow just one leg to drop to the floor while supporting four rostra corners. Also see Rotalocks [page 253].

ACCESSORIES

Scaffold Castors & Conversion Sleeve

Flints stocks the versatile plug type scaffold castors which are suitable for converting steel rostra into slave trucks [with the addition of a short scaffold sleeve if going directly into the rostra corner post]. Fitted with strong nylon wheels [N.B. These may be supplied red]. Has a safe working load (SWL) of 535 kg.

NB: Due to manufacturing tolerances on the plug and the tube, the castor can sometimes be a slack fit.

SPEEDDECK BY RATSTANDS

Smoothed out corner joints

Corner brackets have a cam locking system

Speedlock in the engaged position

Speedlock key that makes it all so special

SpeedDeck

The ideal solution for indoor and outdoor staging! This is our lightest staging solution, so it's easy for professionals or novices to move around. Very simple and quick to build and disassemble.

The Speedlock system allows you to quickly fit decks together in any configuration without grotting around underneath, and it can be done by anyone without the need for heavy tools - just 1 key is required!

It offers a steady stage which can support a weight of 5 kN/m [see the full spec below]. Available in 1 x 1 m or 2 x 1 m per piece of deck, it takes standard sized scaffold legs 48 mm Ø - go for aluminium to keep the system really lightweight, and finish with a 5 mm cap. We can supply legs to your desired height - see page 395, or alternatively look at page 248 for Black Anodised Scaffold Tube for a super swanky finish.

SpeedDeck is especially perfect for venues where there may be limited storage space or when the stage needs to be disassembled after every performance with a quick turn-around.

SPECIFICATION: Aluminium frame. 18 mm birch plywood platform. Diecast aluminium corners. Finishes available: Black phenolic hex pattern, clear varnish, black varnish, carpet. Legs should be cut 28 mm shorter [this allows for the 5 mm cap] than the finished height of the stage. So for a height of 1,500 mm the legs should be 1,472 mm. Accessories: handrails, chair stops, locating bracket, skirting and skirt hooks, modular stairs, fixed stairs, ramp, fascia hangers, trapdoor, grill. Max uniformly distributed weight: 7.5 kN. Max point load [on 0.5 x 0.5 m square] in middle: 2.4 kN. Max point load [on 0.5 x 0.5 m square] along edge: 3.6 kN. Stacking height: 97 mm. Max height without diagonal bracing when loaded with 7.5 kN/m²: 1.2 m. Handrail loading: 0.25 kN - 3 kN.

NB: This is a lightweight deck more suited to a corporate environment than standard theatre decking like Steeldeck.

RATSTANDS

Ratstands

Manufactured in the UK, and shipped worldwide to symphony orchestras, concert halls, theatres and... the US Marines! Started in 1976 when they were asked to develop an illuminated opera stand. Today, they are still the only company who produce one with an integral light. Fit out a whole concert hall or throw a Jazz Stand in a Gig Bag to go busking. Guaranteed quality.

We have opted to not list the details of the Concert or Opera Stands as these are best suited to refurbs or new professional venues, however we can supply these for both full orchestras, and one-off replacements [lights too!] - just send us an email!

ALTO AND JAZZ STANDS - IDEAL FOR SCHOOLS & INDIVIDUAL MUSICIANS

Alto Stand

An unbreakable stand with a strong anodized aluminium stem. Height adjusts without knobs. With 25% less closed height than comparable stands Alto Stands can be stacked on a flat floor or put away in a cupboard. Use with any of the clip-on lights listed below.

Stem: anodised aluminium. Base: polymer. Tray: polypropylene. Feet: natural rubber. Height to base of tray: 715 - 1,601 mm. Tray dims WxH: 503 x 323 mm.

Jazz Stand

Quietly fold in three moves to a size no bigger than the tray and just 70 mm high and pop into the Gig Bag. No need to disassemble. Friction joints can face its base towards or away from the musician. The tray will cope with weight of one "Real Book" but not two.

Stem: anodised aluminium. Base: diecast aluminium. Coating: epoxy. Tray: polypropylene. Feet: natural rubber. Height to base of tray: 432 - 1,207 mm. Tray dims WxH: 503 x 323 mm. Jazz Stand Trolley: WxDxH 570 x 610 x 1,270 mm. Holds 24 Jazz Stands.

RATstands Lights

To put together the systems above you will need the components below. For instance, if you have 20 Opera Stands with 20 Trio Opera Lights and you would like to connect them in a daisychain to your theatre's lighting desk you will need 2 x DMX-PSU [RAT74Q37] as each box can only handle 17 lights, 20 x Daisychain Boxes [RAT74Q31]. The DMX-PSUs come with a power cable and an output that connects to the lighting desk. Easy.

Books

As you approach the 400th page of this catalogue, you've probably already realised that we love books, especially long ones. Every production office and workshop should have a library of reference works, and we think the following should be among them. They go from the charming to the authoritative to the downright jaw-dropping (yes, the Ashley Book of Knots is back in print). All of them are practical and useful. Some of them have even been written by Flints customers. The wife of Paul Carter, author of the Backstage Handbook, once described this catalogue as the British equivalent of her husband's wonderful book. High praise indeed. Happy reading!

PAINTING

Painting Scenery for the Amateur Stage

This brilliant book was sent to us by the author, Scenic Artist Brian Willis. Brian has worked on a staggering amount of amateur, community and professional productions for over 50 years. It documents all the tips and tricks a scenic artist may encounter, illustrated beautifully throughout with Brian's very own drawings. It demystifies stage jargon, all the peculiar language that you have been afraid to ask what it meant is explained in a concise yet friendly way. (Badgers will forever confuse us.) A perfect gift for someone working in amateur or community theatre where your stagecraft is really put to the test, but also great for a professional scenic artist to learn from a real master of the craft.
