OK so these boards really don't look like anything impressive, BUT what they represent is very important. These are boards we made in house when testing out staple guns – this is just one tiny example of the testing and sampling work we do on all products before they can be listed in our catalogue. Might seem like overkill, but we take it very seriously, and want to ensure we are always giving you our honest opinions on products, and that they stand up to the mark! When you consider that we have over 850 new product lines that have gone into this edition of the catalogue, it shows you just how much work goes on behind the scenes!

Sadly things sometimes do go wrong, and we know there have been a few problems with our 6-in-1 staple guns, which is why we have dramatically reduced the price! Of course, if you get a faulty one, we'll replace it hassle free. All part of the Flints Service.

ADHESIVE TAPES

GAFFER TAPES

Gaffer Tape

Flints stocks a consistently high quality gaffer tape. By far our biggest selling gaffer tape is the popular 50 mm wide version which we stock in black, white and silver. We also hold stocks of these colours in 25 mm, 75 mm and 100 mm wide rolls.

We offer a substantial discount on box quantities of gaffer tape. Order your gaffer tape from Flints and we promise not to phone every week asking if you need more. Box quantities may be mixed colours on all widths.

Thickness: 300 microns. Adhesive: 100% natural rubber. Adhesion to steel: 4.9 N/10 mm. Elongation at break: 10.5 %. Tensile strength: 53 N/10 mm.

Advance PVC Tape

An essential tape to have handy! Our PVC tape is fire retardant to BS 3924 31/90 Tp. Available in three different sizes (19 mm, 50 mm and 75 mm). 19 mm is the industry standard width used by electricians. 50 mm and 75 mm are more commonly used as a means of temporarily joining dance floors. All rolls come as 33 m lengths. To reach the quantity break volumes colours can be mixed [in multiples of 8 rolls for 19 mm width]. These tapes are also useful for wrapping around ropes and wires prior to cutting and for colour coding tools and conduit tubes.

Thickness: 0.13 mm. Adhesion to steel: 2.4 N/10 mm. Elongation at break: 180 %, Tensile strength: 26 N/10 mm.

PAPERTAK

PaperTak

Paper based alternative to PVC tape, made using 70% recycled materials with a pressure sensitive natural rubber adhesive. Great for every application where you might use PVC tape except as electrical insulation tape (it's paper!), colour coding, cable management or as spike tape. Core of the tape & packaging are also widely recycled making this tape a more sustainable choice.

MASKING TAPES

We stock a wide range of products to suit all your needs. Our standard masking tape will happily stick to canvas. We have listed the adhesion strengths so you can choose tapes for delicate surfaces and we also stock some high precision tapes for those perfect crisp graphic stripes [top tip, paint the tape in the base colour first for a really crisp finish]. All the tapes are different colours so they won't get mixed up in your tool box. Remember for best results remove the tape while the paint is tacky and pull away from the paint surface at 45°. If your tape needs to remain in place for long periods choose the yellow or blue types designed to be removed without leaving residue after periods up to 5 months!

Tesa Masking Tape

Good quality, suitable for a range of painting tasks. This tape has a strong enough adhesion to stick directly onto canvas so it is popular for marking out mortar lines for scenic brickwork as well as all general scenic use. When used indoors it will give residue free removal for up to three days.

Adhesion level: medium/high. Adhesion to steel 3 N/10mm. Elongation at break: 10%. Tensile strength: 33 N/10mm.

3M Blue Painter's Tape

This really is a very superior product. It is easily removable from most surfaces without leaving any residue up to 14 days after application. It can be used indoors or outside. It gives a crisp edge resisting paint creep. The adhesive is sufficiently strong to adhere well to door handles and awkward fittings. Use it on those special jobs such as masking wood graining and varnish work.

Adhesion level: medium. Adhesion to steel: 2.56 N/10 mm. Tensile strength: 48 N/10 mm.

ADHESIVE TAPES

Low Tack Masking Tape

Designed for painting on delicate surfaces. We have been to great lengths to source a low tack tape with a distinctive colour so it doesn't get muddled up with standard masking tape. The tape will not pull paint off properly prepared surfaces. Suitable for use on many wall coverings. Adhesion level: low. Adhesion to steel: 1.3 N/10 mm. Elongation at break: 4%. Tensile strength: 25 N/10 mm.

Tesa Precision Masking Tape with Longlife Removal

The combination of the extrathin high-quality backing material and the outstanding special acrylic adhesive formulation allows easy removability up to 5 months after application. This enables multiple working processes in only one covering process. This tape is suited for almost all indoor painting applications and even for spatula application techniques. It is especially suited when a precise razor-sharp paint edge is needed. Adhesion level: low. Adhesion to steel: 1.9 N/10 mm. Elongation at break: 4%. Tensile strength: 30 N/10 mm.

Tesa Precision Masking Tape for Delicate Surfaces

A low tack, washable masking tape made from Japanese rice paper, provides safe and secure hold, even on slightly structured surfaces. It is especially suited for indoor applications when a precise razorsharp paint edge is needed. Great for delicate surfaces. Does not leave tape residue. Translucent backing for accurate positioning. Can remain in place for up to 7 days indoors. Adhesion level: low. Adhesion to steel: 0.5 N/10 mm. Elongation at break: 5%. Tensile strength: 32 N/10 mm.

Tesa Masking Tape for Curves

This heavily creped tape has a very high stretch capacity allowing it to be used around tight corners. Its conformability makes it also useful for masking awkward fittings. When using the tape for curves it is the outside stretched edge that forms the neat line while the inside edge tends to pucker. Adhesion level: high. Adhesion to steel: 4.5 N/10 mm. Elongation at break: 58%. Tensile strength: 28 N/10 mm.

FROGTAPE

We always have requests for Frog Tape as a familiar brand name however we find it pales in comparison to our precision masking tapes (both for long-life removal and for delicate surfaces). Also, it comes in totally unnecessary plastic packaging, so we're not fans of its poor environmental credentials.

FrogTape

Designed for use with emulsion paint, FrogTape can be used to create crisp lines, minimising paint bleed. Available in a multi-surface and a delicate version. The multi-surface tape will adhere to wood, glass, metal and stone and can be used for most paint applications. The delicate tape is recommended for decorative painting and can be applied to freshly painted materials or sensitive surfaces.

MASK IT

Mask It

A very low tack saturated paper which is 4' wide. It should not damage existing wallpaper or paint and Mask It can be painted! Perfect for location work, just cover the existing wall coverings with Mask It and paint it whatever colour suits your shot. It will wrinkle when wet but soon dries out flat. After the filming is complete just peel it off to reveal the old wallpaper. Also useful for stencilling and general masking. 22.8 m rolls. Try a sample first – we also sell it by the metre. Avoid using on flaking or poor surfaces.

Right, Mask It peels away cleanly. Below, before and after application of Mask It.

PEELABLE MASKING PAINT

Peelable Masking Paint

A unique system that will temporarily decorate or cover large structures indoors or outside for up to 12 months. When it is time to uncover again just peel it off. Use it to blank off unwanted signage, mask off complex areas, change the colour of items that need to be restored to their original state such as camouflaging helicopters or cars for film use. Use it as a protective cover during winter periods to keep the frost off varnish etc. Grey. Tack-free in approximately 140 mins.

DANCE FLOOR TAPE

ReUselt

The revolutionary way to install flooring! Now you can install virtually any floor surface over any existing sub-floor* without messy adhesives, or having to hire expensive flooring contractors. A semi-permanent installation with permanent performance and feel! The ReUselt system gives you all the benefits of a permanent installation with the ease of a semi-permanent installation without the use of top tape or the hassle of resetting your floor every two years. Yet when you need to remove the floor you simply peel it up and take it away. Simply purchase new supply of ReUselt and install at your new location. Used ReUselt can be removed from the sub-floor and thrown away. You can install it yourself and it's idiot proof.

*An exception is MDF which can be very dusty even when you think it is clean as because of the way it is made there are always particles in the pores. MDF is almost never used for any type of flooring but if it is used make sure it is sealed MDF so then bonding won't be an issue.

DOUBLE-SIDED TAPES

High Grab

is a high quality double-sided cloth tape that will form an immensely strong bond between tape and surface, so strong it will tear veneers off plywood. Appears white. Also in Medium Tack version.

Adhesive: hydro carbon resin. Adhesion to steel: 11.5 N/10 mm. Tensile strength: 29 N/10 mm.

code	width	price
TAP061	50mm	£10.95

Expo Tack

is a tape which has one side low tack to avoid floor damage. The other side is medium to high grab.

Choose this tape for temporary fixing of carpets to floors or for fixing drape surrounds to rostra. Apply the open side to the floor leaving the high tack for the carpet. It will remove without leaving residue. It is NEC approved. Transparent.

Low tack side adhesion to steel: 1.2 N/10 mm. High tack side adhesion to steel: 9.2 N/10 mm. Temperature service range: -20° - +120°C.
