

Plastidip

Dip your ropes in Plastidip and there is no need to whip the ends. It leaves them rigid with a comfortable feel. Made from synthetic rubber it can also be used on metal, wood, glass, rubber, and fibre glass. Prevents corrosion, slip-proofs treads, seals clay pots, adds grip to tools. The clear Plastidip can be used to weatherproof paper maps. Can be peeled off non-porous surfaces. Air dries. Allow 30 minutes between coats, 4 hours minimum dry time before use. Clean brushes in Xylene or thinners [page 69]. Always wear a mask, even in the open air, and one that is suitable for organic vapours like our reusable respirator 3M 4251 on page 364. UN 1139. Now available in a new smaller size!

ENAMEL PAINTS

Rosco Colorcoat

Rosco Colorcoat is a durable waterborne acrylic enamel modified to provide superior adhesion and abrasion resistance. It can be used on most interior and exterior surfaces where maximum durability is required. Not suitable on soft or flexible substrates. Flat Black Colorcoat is widely used by theatre engineering shops as a safer alternative to priming steel with etch primer. During Flints sampling we were highly impressed with Colorcoat's adhesion to aluminium. We would recommend this product as a substitute to two-component primers for painting aluminium truss and lighting bars especially for painters keen to avoid solvent-laden paints. It is water-based, so brush cleaning is easy. Rosco recommend Colorcoat for use on floors and scenery which endure heavy handling. Clear Colorcoat can also be used as a heavy-duty sealer over all Rosco paints. Covers 7 - 8.5 m² per litre. See page 13 for Metal Primers.
