

SPECIALIST SCENIC FINISHES / METALLIC PAINTS & POWDERS

Hato®Tex Phosphorescent Paint

This excellent glow-in-the-dark paint from Haussmann is perfect for both specialist effects on stage, and also for marking up back stage. Although the binder of the paint has been specially formulated to improve adhesion and flexibility when applied to fabric surfaces (in our testing we were really impressed with the flexibility), it is equally well applied to solid substrates such as wood, thermoplastics etc. We found that although it was a neutral coating, when applied onto Flints Black it was a little creamy (not noticeable on white surfaces). Once charged with UV / Tungsten light the pale green glow is incredibly effective. Well priced for a glow-in-the-dark paint, we stock the 50 ml tester pots for those smaller jobs.

HATO®Nano Textile Protector

HATO®Nano Textile Protector has been specially developed to seal fabrics and paintings with a selfcleaning, lotus effect. Various stage materials, paintings, furniture, as well as natural and synthetic clothing and costumes can be protected with HATO®Nano Textile Protector. It has been tested with oil and water-based substances such as mustard, ketchup, and wine. We tested it with Pigs Might Fly Blood [page 120] and it rolled right off. Garments treated with HATO®Nano can survive several washes [up to 30° C, max. 4 cycles before reapplication]. Apply by brush, low pressure, or airless sprayer. For small surfaces HATO® Nano Textile Protector can be applied with a hand-held spray gun. We recommend testing the product on a small section of the fabric before use.

SPECIFICATION: Consumption: approx. 120 - 150ml / m².

METALLIC PAINTS & POWDERS

Bristol StandTex Metallic Palette

The Silver is a bestseller with Flints for good reason. Like all the Bristol metallics it is water-based with exceptional coverage and is ready to use. A unique feature of Bristol Paints which proves popular is that they can be mixed with the Bristol Primary Palette [see page 22] to create metallic colours which are very durable. Simply mix the paints together to the desired effect then add 25% of AquaPlus [page 28] to prevent the colour and metallic from separating. This range of metallics is also available in a durable high adhesion water-based polyurethane. Please phone for details.

METALLIC PAINTS & POWDERS

Polyvine Acrylic Metallic Paint

Polyvine's metallic paint is produced without using metallic powders. The product has unusually good brushing and spreading properties making it a good choice for large areas such as walls. They can be tinted with Polyvine colourisers. The finish can be burnished with a soft cloth to a shine.

Treasure Gold Liquid Leaf

These amazing gilding paints give a fantastic lustrous finish, thanks to the emulsion of primer and ultra-thin leaf particles. Like the paste, these paints are suitable for use on a wide range of surfaces - wood, glass, ceramics, papier-mache, cardboard etc. The paint goes really far - 30 ml will cover approximately 2m² - and the smooth flow makes it really easy to spread without leaving any brush marks, alternatively it can be sprayed - just thin with the Brush Bath solvent [15-20%] listed below which is also used to clean up. To protect your finished surface, the Treasure Sealer is a perfect choice as it also retards tarnishing.

Cellulose Bronzing Medium

Ormaline metallic paint medium for making metallic paints using the powders on next page. See also shellac-based Transparent Polish [page 68] which can also be used as an economical medium for the powders.

code	description	volume	price
PATBM1	Ormaline Medium Base	1L	£51.50
PATBM2	Ormaline Medium Base	250ml	£17.33

Flints Bronze and Aluminium Powder

Technically speaking these bright powders are actually termed "flakes". They are suitable for making bright metallic paints when mixed with a glaze, Cellulose Bronzing Medium or Shellac [page 68]. If you require a metallic powder for mixing with polyester resin then refer to the specialist powders [page 137]. The colour of the finished effect can look very different to the colour in the pot, so do a test first. Opinions vary, but allow 500 g for 2.5 litres as a guideline. First time users should download a safety data sheet from the "Downloads" section of flints.co.uk.

Please note that it is virtually impossible to accurately show metallic colours in a printed catalogue. These are for guidance only.

Rylards Brass Lacquer [Incralac]

This brass lacquer is used in many demanding situations for protecting such metals as brass and copper, and is intended for interior or exterior use. With an excellent balance of hardness, adhesion and film toughness, it has superb resistance to UV light and resists yellowing and loss of gloss and clarity as it ages. The applied film also provides excellent flexibility and resistance to cracking and flaking. Brushes can be cleaned with Cellulose Thinners [page 69]. See also Polyvne Multi Surface Lacquer [page 62].

code	description	volume	price
PATBL400	Aerosol	400ml	£27.00
PATBL500	Can	500ml	£20.43

Iron Powder

This fine iron powder will rust quickly with water and is excellent for realistic rust effects. For best results apply a coat of a matt glaze such as Polyvne Dead Flat [page 60] onto your base colour. While the glaze is still wet sprinkle liberal quantities of iron powder into the glaze and spray with vinegar using a hand-held mister [page 106]. The iron powder will immediately begin to rust. Realistic-looking riveted steelwork can be achieved by glueing our Wooden Rivets [page 110] to MDF and applying some flat glaze around the edges and letting it run. Sprinkle with iron powder, spray with vinegar and it will look like rust is weeping from the rivets. Excess powder can be swept off when the glaze is dry. We can also recommend trying the HATO®Rust Effect see above.

code	weight	price	10 kg+
DPP258	1kg	£15.85	£14.28

Flints Graphite Powder

Graphite powder is a crystallised form of carbon. This Flints Graphite Powder is particularly fine and is warm grey in colour. It is excellent for lubricating lock mechanisms. Mixed with emulsion glaze and emulsion paint it will, when brushed onto a surface, resemble a lead/metallic surface, especially if lightly abraded or polished. It can also be used as a powder with polyester resins to give an aged metallic effect. Do not use graphite powder near electrical equipment such as weighing scales, calculators and computers as it may cause short circuits. See also Liberon Iron Paste below.

code	Colour	weight	price
PATGP0200	Graphite	200g	£5.95
PATGP2400	Graphite	2kg	£57.14

Liberon Iron Paste

This paste will restore the appearance of cast and wrought ironwork such as grates, fire surrounds and fire irons. For scenic use it can be used on firebacks, stoves, boilers and pipes but it shouldn't be used on working woodburning stoves or radiators. Apply sparingly with a brush or cloth and buff up after at least 4 hours with a cotton cloth. Makes wooden scenery look like solid cast iron. 250 ml is enough for up to seven fireplaces.

code	volume	price
PAT396	250ml	£13.79

METALLIC PAINTS & POWDERS

METALLIC SPRAYS

Kobra Metallic Spray

With a high "solid" content to ensure great rapid coverage on any surface. It is perfect for painting on canvas, wood, metal, glass, paper, card, plastic, concrete, brick and more. We are particularly impressed by the gold, which is the best we've tried. 400 ml can. Flints stocks a selection of vibrant colours and fluorescents, see page 75.

code	Colour	volume	price	6+
PATKOB0452N	Gold	400ml	£4.95	£4.45
PATKOB0462N	Copper	400ml	£4.95	£4.45
PATKOB0472N	Silver	400ml	£4.95	£4.45

Plasti-Kote Brilliant Metallic Spray

We think there are better metallic sprays out there but Plasti-Kote are the market leaders and, as we like to say in the theatre, you can't argue with the box office.

code	Colour	volume	price	6+
PAT160	Gold	400ml	£10.25	£9.45
PAT161	Silver	400ml	£10.25	£9.45
PAT162	Copper	400ml	£10.25	£9.45

Cosmoslac Silver Chrome Spray

When Aircraft Silver Chrome was discontinued the hunt began for a new chrome effect spray and we think this is the best of the bunch. We always test new products in-house which means you can spend less time sampling and just get the best product for the job. Some of the "chrome" sprays we tested were just metallic silver but we were impressed with the reflective nature of this spray. If you look closely you can also see the tester reflected on the lid of the spray can!

Coverage 2m² approx.
Always keep spray can an even distance away from substrate whilst spraying, at 25cm away.
