## FLOOR DRESSINGS

### Slip Nomor 2000 "Liquid rosin"

A non-slip solution that adds a slip resistant surface to all floor surfaces, including wood, vinyl, tile and linoleum. Widely used by theatre, opera and dance companies. The perfect substitute for rosin [which is not recommended on vinyl floors]. It will not damage any surface. You can control the degree of non-slip simply by adding water. Dilute ten times for the usual mix. One pot will cover approximately 900 m<sup>2</sup> once diluted. The treatment will normally last up to a week, after which it should be cleaned off with warm water [or ProClean, not ProClean NS] and a new application made.

## NON-SLIP ADDITIVES

### Griptex

Griptex particles are specially manufactured to provide non-slip surfaces. They can be mixed into, or broadcast onto wet paint. If used with varnish it will obscure the substrate. 960 ml is enough for 17 L of paint. This product is designed to be used with oilbased products but will also work with a strong water-based glaze.

### Non-Skid Beads

A 20 g container with enough beads to treat 750 ml paint or varnish. Very similar to Fine Griptex.

PAT403	20g	£7.95

### Rosin

This is the resinous by-product when turpentine is distilled from resin from trees. Used by printers in the aqua-tinting process, occasionally by painters during the mixing of oil paints and, in solid form, by violin players. Dancers apply rosin, from rosin trays, to their shoes to improve grip.

### Weave Filler 916, & 916 SE [Flame Retardant]

These weave fillers are highly elastic materials which are primarily designed to fill open weave textiles such as scenic gauzes and strawberry netting. They are also widely used to provide a reliable non-slip surface to the underside of rugs, druggets, carpets, stage cloths etc. They enable scenes to be quickly set because cloths will flop down and grip the stage floor without needing tacking out or taping. Also useful to prevent fraying to cloths. The flame retarding chemical used in the 916 SE flame retardant version may discolour some dark coloured materials so please undertake a test before using. Also, the 916 SE flame retardant version is only available in 10 kg size and has a 6 month shelf life, so please buy as required.
