SPRAY PAINTS

Kobra Spray Paints

Newly formulated and some of the colours have changed but Kobra still has a high "solid" content to ensure great, rapid coverage on any surface. It is perfect for painting on canvas, wood, metal, glass, paper, card, plastic, concrete, brick and more. All these sprays have a matt finish but we would say they have a slight sheen to them so for best dead flat/matt finish see Decoration Sprays. Comes with a Fat spray pattern nozzle for high output and wide spray pattern, spare nozzles in a variety of spray patterns also available separately.

The Black cap is also called the 'Monster cap' and varies the spray pattern depending how hard you press the nozzle. *Top Tip* To get the most out of your nozzle, clear the nozzle after use by turning the can upside down and spray until clear gas runs out.

Flints Lantern Black Heat Resistant Spray Paint

Plasti-Kote Fluorescent Spray

We have tried various makes and have found these Plasti-Kote fluorescent sprays do give the brightest results and the most even coverage. They make some other fluorescents seem chalky in comparison. The range is rather limited but fluorescent blues never seem to fluoresce very much. Don't forget that all fluorescent paints require a white basecoat such as the Matt White Primer on previous page.

Cosmoslac Silver Chrome Spray

When Aircraft Silver Chrome was discontinued the hunt began for a new chrome effect spray and we think this is the best of the bunch. We always test new products in-house which means you can spend less time sampling and just get the best product for the job. Some of the "chrome" sprays we tested were just metallic silver but we were impressed with the reflective nature of this spray. If you look closely you can also see the tester reflected on the lid of the spray can.... Coverage 2m² approx. Always keep spray can an even distance away from substrate whilst spraying, at 25 cm away.

Dirty Down Rust

This effect works best on metals but it can also be sprayed onto paper or virtually any substrate just like the ageing sprays. See also Dirty Down Paint-On Rust on [page 38] and Iron Powder [page 37 and 41].

Dirty Down Mould

Like bread mould but with some thickness as if it is growing out of the wall etc. that it is sprayed on. Use it to reduce the exorbitant rent your landlord charges you on your flat.

Dirty Down Frost/Snow

A light spray from the can will give a gentle frost effect. A harder spray creates a hard frost or snow. For other snow effects see Fosshape™, Marble Dust [page 30], and Opalina Snow [page 46].
